Objective

Enthusiastic IT graduate with a foundation in Java, data structures, and database management. Passionate about developing scalable software solutions and solving problems through efficient coding. Skilled in debugging and quick to learn technologies. Eager to begin a career as a Software Developer and contribute to innovative projects in a collaborative environment.

Education

Knowledge Institute of Technology , B.Tech Information Technology	Nov 2022 – Present
Shri Vidhya Bharathi Matric Higher Secondary School , HSC	June 2021 – May 2022
Shri Vidhya Bharathi Matric Higher Secondary School , SSLC	June 2019 – May 2020

Intern Experience

Web Developer Intern , WSPL Hosting Solutions – Tiruchengode	May 2024 – May 2025
- Contributed to the development of responsive web applications using HTML, CSS, and JavaScript for the front-end and MySQL for the database. - Assisted in designing and implementing database structures to optimize performance. Collaborated with team members to debug, test, and deploy features, ensuring seamless user experiences.	

Projects

Personalized Tourist Guide - HTML, CSS, JS	
- Developed a website that recommends tourist places based on the user's selected destination and interests, enhancing travel planning with personalized suggestions. - Implemented a user-friendly interface allowing visitors to explore key attractions, travel tips, and destination.	
Orphan Donation Platform - HTML, CSS, JS	
- Developed a comprehensive blogging platform that facilitates content creation and consumption, allowing users to publish articles and log their reading and writing productivity. Integrated a feature to generate personalized Reader and Writer Dashboards for visualizing user engagement over time. - Implemented an activity metrics section where users can view dynamic activity heatmaps, calculate daily streaks, and earn automated achievements based on their consistency and interaction with the platform.	
Smart Event Booking and Ticketing System - React, Spring Boot, MySQL	
- Developed a full-stack event booking platform enabling users to browse events, book tickets, and complete secure online payments, providing a seamless end-to-end booking experience. - Designed and developed RESTful APIs using Spring Boot with layered architecture (Controller, Service, Repository, DTO), integrating MySQL for persistent data management.	

Achievements and Participation

Project Expo – Mahendra Institute of Technology
Hackathon – Advaya, BGSCET
National Level Conference – Knowledge Institute of Technology

Skills

Programming Languages - C, Java, SQL, JavaScript
Frontend - HTML, CSS, React
Backend - Spring Boot
Database - MySQL
Tools & Platforms - Git, GitHub, Sonar Cloud
